**SECTION 4: FIRST AID MEASURES**

**First Aid Measures**

**Inhalation**

Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferable by mouth to mouth, if possible.

**Eye Contact**

Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Get medical attention.

**Ingestion**

Drink plenty of water in small gulps. Do not induce vomiting unless told to do so by the poison control center or doctor. Never give anything by mouth to an unconscious person.

**Skin Contact**

Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. If irritation persists, get medical attention.

**Most Important Symptoms and Effects, both Acute and Delayed**

**Symptoms**

Eyes may have symptoms of redness, itching, irritation, burning and watering from overexposure. Prolonged or repeated skin contact may cause irritation. Irritating to nose and throat.

**Indication of any Immediate Medical Attention and Special Treatment Needed**

**Note to Physicians**

Treat symptomatically. Medical conditions aggravated by exposure: Prolonged contacts may result in irritation to eyes, skin and mucous membranes.

## SECTION 5: FIRE-FIGHTING MEASURES

### **Suitable Extinguishing Media**

Extinguish with large amounts of water.

**Unsuitable Extinguishing Media:** Dry chemicals; Carbon dioxide; Halogenated agents

### **Specific Hazards Arising from the Chemical**

In case of fires, hazardous combustion gases are formed: carbon monoxide and carbon dioxide; hydrogen chloride; chlorine; nitrogen; nitrogen trichloride (explosion hazard!); and isocyanic acid

### **Protective Equipment and Precautions for Firefighters**

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

### **Other Information**

The product is not combustible, however it promotes fire. Containers close to fire should be transferred to a safe place. Cool endangered containers with water spray jet. Collect contaminated firefighting water separately, must not be discharged into the drains.

## SECTION 6: ACCIDENTAL RELEASE MEASURES

### **Personal Precautions, Protective Equipment and Emergency Procedures**

**Personal Precautions:** Use personal protective equipment as required in sections 7 and 8. Avoid dust formation. Ensure adequate ventilation. Avoid contact with skin, eyes and clothing.

**Environmental Precautions:** This material is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of EPA.

### **Methods and Material for Containment and Cleaning Up**

**Methods for Containment:** Prevent further leakage or spillage if safe to do so.

**Methods for Cleaning Up:** Collect mechanically (preferably in dry condition). Send in suitable containers for recovery or disposal. Containers in which split substance has been collected must be adequately labeled.

## SECTION 7: HANDLING AND STORAGE

### **Precautions for Safe Handling**

**Advice on Safe Handling:** Provide good ventilation of working area (local exhaust ventilation if necessary). Product inherent handling risks must be minimized by taking appropriate measures for protection and preventive actions. The working process should be designed to rule out the release of hazardous substances or skin contact as far as possible by the state of the art. Avoid the formation and deposition of dust. Keep away from sources of ignition.

### **Conditions for Safe Storage, Including and Incompatibilities**

**Storage Conditions:** Containers which are opened must be carefully resealed and kept upright to prevent leakage. Always keep in containers of same material as the original one. Keep container tightly closed and dry in a cool, well-ventilated place. Protect from atmospheric moisture and water. Keep under inert gas.

**Incompatible Materials:** Organic materials; combustible materials; ammonia; ammonium compounds, alkalis; oxidizing agents; reducing agents; and acids.
